

LittleFingers™

WHERE LITTLE IS JUST RIGHT

QUICKSTART GUIDE

Congratulations on your purchase of Datadesk's LittleFingers™

The LittleFingers™ keyboard had been sized to fit children's and smaller adult's hands. The patented LittleFingers™ layout utilizes key caps and key cap spacing that has been carefully engineered to allow persons with smaller hands, to easily reach all of the keys, without having to stretch. With keyboarding now being taught starting in elementary school, LittleFingers™ can assist in the development of one of the most important computer skills – touch-typing. It is just right for most elementary and middle school children ages from 6 to 13 years old. Further, the combination of a smaller keyboard with an easy-to-reach numeric keypad, is helpful for even still younger children that are just beginning to use a computer. LittleFingers™ can either be used as a replacement keyboard for the larger adult-size keyboard, or utilizing it's exclusive "dual-mode" feature, it can augment the existing keyboard and mouse, rather than replace them. This means the adult keyboard and mouse, and the LittleFingers™ keyboard when properly installed, all remain functional.

CONNECTING LITTLEFINGERS™ TO YOUR PC:

The LittleFingers™ keyboard plugs into the USB port on your PC. There is an extra USB port on the back or the LittleFingers™ for attaching other USB compatible devices, such as an adult-sized keyboard.

LITTLEFINGERS™ DUAL PURPOSE KEYS

LittleFingers™ incorporates a space-saving layout, which includes all of the most commonly used keys. It also achieves full 105-key functionality through its exclusive *dual-purpose* keys feature. This feature provides for some of the less commonly used keys, such as Home, End, etc. to be available as secondary keys. The legends for the secondary key functions are printed on the front skirts of the keys. Below is a list of the secondary key functions and the keys they are on.

IF YOU HAVE QUESTIONS:

If you need further help, please contact Datadesk Technical Support:

PHONE: (206) 842-5480 • FAX: (206) 842-9219 • EMAIL: support@data-desk.com

The *Dual-Purpose* Keys:

SECONDARY KEY FUNCTION	KEYS	KEY COLOR
<i>Insert</i>	Right Alt/Cmd Key	Green
<i>Delete</i>	Back Slash Key	White
<i>Home</i>	Left Cursor Key	Blue
<i>End</i>	Right Cursor Key	Blue
<i>Page Up</i>	Up Cursor Key	Blue
<i>Page Down</i>	Down Cursor Key	Blue
<i>Number Pad Enter</i>	Large Enter/Return Key	White
<i>Windows Applications</i>	Option/Windows Key	Yellow

To **engage** the secondary keys, **Press** the **Function** key (it has the **fn** legend) once, next Press any key with the secondary key function you wish to use. Whenever, LittleFingers™ is in the dual-purpose mode, the LED labeled *function* will be lit. Press **fn** again to turn off the dual function features.

USING LITTLEFINGERS™ WITH WINDOWS NT™

To log on to a Windows NT server, the key sequence of **Control-Alt-Delete** is accomplished by depressing the **fn** key once (to engage the Secondary Key Functions), then pressing the **Control** and **Alt** and the **Back Slash Key** (it has the **del** legend on the front skirt).
