The Little Keyboard with the Big Difference

QUICKSTART GUIDE for USB PC

Congratulations on your purchase of Datadesk's Lil'BigBoard.

The Lil'BigBoard provides full 105-key functionality with a space-saving, 97-key layout by using Lil'BigBoard's exclusive dual-purpose keys.

CONNECTING LIL'BIGBOARD TO YOUR PC

The Lil'BigBoard plugs into the USB port on your PC. There are USB ports on both sides of the keyboard for attaching other USB compatible devices such as mice.

ADJUSTING THE KEYBOARD FEET

You can adjust the angle at which the Lil'BigBoard sits by raising the keyboard feet. At the back of the foot, where it attaches to the keyboard, you'll see a slightly raised ridge. By pressing on that ridge (towards the back of the keyboard), you'll open the foot.

CONTROL PANELS

You can use your computer's Control Panel to set the Key Repeat and Delay Until Repeat rates for your Lil'BigBoard. To access this Control Panel, open the START menu, go to Settings, select Control Panels, then Keyboard. Adjust the settings as desired.

DUAL PURPOSE KEYS

Lil'BigBoard utilizes the four cursor keys to also provide **Home**, **End**, **Page Up** and **Page Down** keys. Along with these keys, the **Right Command** and **Backslash** keys will function as **Insert/Help** and **Delete**. The return key will act as number pad **Enter**.

To engage these functions, **PRESS AND HOLD** the **fn** key, then **PRESS** the key with the dual purpose function you wish to use. Note that the key's second function is printed on the front of the key.

The Dual-Purpose Keys:

SECONDARY KEY FUNCTION

Insert
Delete
Home
End
Page Up
Page Down
Number Pad Enter
Windows Applications

KEYS

Right Alt/Cmd Key
Back Slash Key
Left Cursor Key
Right Cursor Key
Up Cursor Key
Down Cursor Key
Large Enter/Return Key
Option/Windows Key

FUNCTION KEYS: F1-F15

The Lil'BigBoard provides fifteen user-definable function keys. Windows-style operating system software utilizes F1 as help, F2 to rename an item, F3 to find files or folders and ALT + F4 to quit a program. F13 is assigned to Print Screen. Microsoft Excel assigns the F14 key to toggle the Scroll Lock function. F15 is assigned Pause.

Some software has preprogrammed functions assigned to these F-keys, such as Microsoft Word, Word Perfect and Nisus. Please consult your manuals to determine if and how this feature is implemented in your software.

To get maximum utilization from your function keys, third-party macro or shortcut software programs such as Keyboard Express or Macro Express can be used. This type of software will allow you to design shortcuts which instantly execute multi-step tasks, reduce complex commands and program functions to a single keystroke.

USING LIL'BIGBOARD WITH WINDOWS NT™

To log on to a Window NT™ server, the key sequence of **Control-Alt-Delete** is accomplished by depressing and holding down **Ctrl** and **Alt** and then pressing and holding the **fn** key (engaging the Secondary Key Functions), then pressing the Back Slash Key (it has the *del* legend on the front skirt).

WARNING

Some studies indicate a possible correlation between extended periods of repetitive motion and some types of physical pain and injury including Carpal Tunnel Syndrome, Tendinitis and Tenosynovitis.

Take these precautions to reduce the risk of repetitive stress injuries:

- Keep your wrists straight while typing.
- Do not rest on your wrists while typing.
- Touch keys lightly.
- Rest frequently to avoid muscle exhaustion.
- Avoid unhealthy habits.

For further information, please make contact with a qualified health professional.

To take advantage of updated information, register your new keyboard on our website, or mail in the registration card enclosed.
